DeCurret Inc.

PRESS RELEASE

DeCurret, Launching Japan's First Bitcoin Mining Machine Sales and Operation Services

DeCurret Inc. (HQ: Chiyoda-ward, Tokyo Japan; President & CEO: Kazuhiro Tokita, hereinafter “DeCurret”) is pleased to announce that it will be the first domestic crypto asset exchange provider*¹ to offer small-lot sales and operation services for Bitcoin mining machines.

DeCurret will start selling and servicing mining machines.

- 01 Mining in large overseas mining farms, where it is difficult for individuals to enter.
- 02 Customers only need to purchase a mining machine, no hassle.
- 03 No machine setup or maintenance required
- 04 You will receive mining rewards (bitcoins) every month.^{*2}
- 05 (For corporations) Can be recorded as depreciation expense.^{*3}

DeCurret

※ 1 : As of February 25, 2021, for the first time among 27 crypto-asset exchangers registered with the Kanto Local Finance Bureau and Kinki Local Finance Bureau of the Ministry of Finance

※ 2 : However, due to a decline in the BTC price, a sharp rise in electricity and other expenses, or the payment of operation and management fees, the amount after deduction may be zero BTC and you will not receive the reward, or the amount you pay may be larger (negative yield) and you will be asked to pay the difference.

※ 3 : Please consult your accountant or tax accountant for details.

■Overview

To broaden the scope of bitcoin mining, we have partnered with a large-scale overseas mining firm to offer small-lot sales and operation services for mining machines. Customers who purchase a mining machine will be able to receive monthly mining rewards (bitcoins) without having to install or maintain the machine themselves*2, and the rewards they receive will be securely stored in our cold wallet.

【What is Mining?】

Mining is the process of approving transaction data to stabilize the blockchain ecosystem of various crypto assets such as Bitcoin. It is called "mining" because it is similar to mining a small amount of gold or other resources from a large mine. In the case of Bitcoin, the first successful miner receive the newly generated Bitcoins as a reward for mining. In 2020, several U.S.-listed companies that specialize in bitcoin mining are actively investing in the mining business, and this, combined with the soaring price of bitcoin, is attracting more and more attention.

In addition to the ability to procure machines that generate a large amount of computing power and the high technical hurdles to keep the machines running stably, mining is also required an understanding of crypto assets, making it a high hurdle for individuals to enter the market.

■ Company Overview

Name: DeCurret Inc.

URL: <https://www.decurret.com/>

Location: 2-10-2 Fujimi, Chiyoda-ku, Tokyo

Business description: Financial services involving trading and settlement of digital currencies

Virtual Currency Exchange Operator - Kanto Local Finance Bureau No. 00016

Certified Fund Settlement Firms Association: Japan Virtual and Crypto assets Exchange Association

■ Main risks when trading cryptocurrencies

- A cryptocurrency is neither a Japanese currency nor a foreign currency. The cryptocurrencies we handle are “decentralized cryptocurrencies” traded and issued over the internet, and their values are not guaranteed by any specific states or other parties.
- Use or possession of a cryptocurrency may be restricted in certain countries/regions under their laws and regulations.
- A cryptocurrency trade may result in a loss or significant decrease in value of the cryptocurrency from price fluctuation.
- Differences exist between buying and selling prices in cryptocurrency trades. During times of high market volatility or decreased liquidity, the differences between buying and selling prices may increase, the acceptance of orders may be interrupted, and so on. Customers may therefore be unable to complete transactions as intended.

DeCurret

- A cryptocurrency itself may lose all value due to breakdowns in the systems for transferring the cryptocurrency, or other reasons.
- In case the Company's business is interrupted by events including bankruptcy, we may not be able to return the deposited money and cryptocurrency to the Customer.
- If the private key is lost, the Customer may not be able to access the cryptocurrency in the portfolio which may result in decreased value. In addition, if the private key becomes known to a third party, the Customer may incur unexpected losses.
- A cryptocurrency may be used for payment of consideration subject to agreement by the counterparty receiving such payment.
- When entering into a cryptocurrency transaction, read the "Document Prior to Execution of Contract" and "Overview of Cryptocurrency" in advance and conduct transactions with sufficient understanding, at the Customer's own decision and responsibility. If there are any questions, the Customer is to confirm prior to the start of transactions.
- For leveraged trading, deposit of margin with the Company is required prior to the transaction. Leveraged trading enables a customer to make transactions larger than the margin he/she has deposited with us. Thus while there is a possibility of significant profits, there is a corresponding risk of significant losses. Losses are not limited to, and may exceed, the value of the deposit. For details on margins, including the amount of margin required, how to calculate it, and the margin requirement rate, please visit our website.
- The order price displayed in the trade screen at the time the order was placed may differ from the actual contract price. It may be caused when it has taken long for our trading system to execute the order after it is received from the customer, as a result of communication issues between the device of the customer and our trading system, sudden changes in the price of the currency, etc. This may work to the customer's advantage or disadvantage.
- Customers may be unable to complete transactions as intended, due to factors such as a disaster, communication failure of public lines, delay in processing by the framework for recording transfer of cryptocurrency value, and other events beyond the control of the Company.
