
- Issuance and settlement methods for yen-denominated private-sector digital currencies, as well as the structure of the forum (74 companies, banks, local governments, and organizations) and use cases by 10 subcommittees.

DeCurret Inc. (HQ: Chiyoda-ward, Tokyo Japan, President & CEO: Kazuhiro Tokita) is serving as the secretariat of the Digital Currency Forum, a forum to study the practicality of digital currencies in Japan, with the participation of more than 70 companies, banks, local governments, and organizations from a wide range of fields, including Japan's leading banks, retail, transportation, and information and communications, as well as experts and observers from relevant ministries, agencies, and central banks.

The Digital Currency Forum has recently compiled a white paper on the issuance and settlement methods of digital currency on a two-tiered digital currency platform, and a progress report on the activities being conducted by 10 subcommittees to study proof of concept (PoC) and use cases.

The Digital Currency Forum (hereafter referred to as "the Forum") will release these two reports.

*The white paper and progress report can be found here.

1. Two-tiered Digital Currency Platform White Paper

To provide a broader understanding of the digital currency that the Forum has been studying, we have compiled a white paper on the functions, legal characteristics, system structure, and value provided by the digital currency in the "Two-tiered Digital Currency Platform". We believe that this digital currency will be able to connect with other digital platforms in many ways, and that various economic activities and businesses will be able to incorporate the functions of the digital currency according to their own needs, adding payment and settlement to a wide range of services. The goal is to realize a form of "Digital Payment as a Service.

2. Digital Currency Forum Progress Report

Since its establishment in December 2020 as an extension of the Digital Currency Study Group held from June to September 2020, the Forum has been discussing various use cases of digital currency with leading Japanese companies and banks participating in the Forum, with the aim of establishing a new settlement infrastructure that responds to the digitization of the economy and society. We have been discussing various use cases of digital currency with the leading Japanese companies and banks participating in the Forum. By reflecting the wide variety of ideas and requirements generated through these discussions in the development of the platform, we are working to build a truly practical digital payment infrastructure. In addition to the desk study of use cases, we plan to verify the feasibility of specific services and businesses through Proof of Concept (PoC).

Currently, 74 companies, banks, local governments, and organizations are participating in the Forum. Ten subcommittees established within the Forum are working on drafting scenarios for the use of digital
currency and the vision that digital currency aims to achieve. In the field of technology, active discussions and initiatives are underway from various perspectives toward the realization of privately issued digital currencies, including the exchange of opinions among engineers in various fields and mutual use of the Sandbox environment for digital currency platforms.

We report progress of these activities in this Progress Report.

Subcommittee names

- Electric Power Transaction Subcommittee
- Retail and Distribution Subcommittee
- Regional Currency Subcommittee
- Wallet Security Subcommittee
- Electronic Money Subcommittee
- Security Token Settlement Practices and Systems Study Subcommittee
- Credit Card Company Member Store Settlement Subcommittee

【About the Digital Currency Forum】

1. Purpose

Subcommittees to be held for each use case to examine the practicality of digital currencies and to examine the common areas of two-tiered digital currency, the added value of services, and the cost savings in new investment and renewal investment related to infrastructure. We conduct "design, development and experimentation" in the domain. Through conceptualization (PoC), we aim to find a consensus on technical issues, KYC, AML/CFT compliance, and other issues and solutions for real-world use of digital currencies, and to standardize services and infrastructure.

2. Summary

Chair: Mr. Hiromi Yamaoka, Director, Future Corporation (former head of the Payment and Settlement Systems Department, Bank of Japan)
Secretariat: DeCurret Inc.
Period: From December 2020
   (The period and frequency to be set for each sectional meeting.)
Main discussion topics:
- Examination of the practicality of digital currencies in each use case
- Requirement definition, design and development of common and additional areas
Identification of issues and solutions for the actual operation of digital currencies, and creation of standards
